

# The Willow Song

---

D

Weep for the Willow

Em

Its branches are hanging down

D

The pattern has been set

Em            A7    D

Its leaves are turning brown

D            A7            G

I'm sitting alone tonight

D            A7            G

Thinking about our plight

Bm                    A7

Unless we get together

C                    Em

We'll be lost forever

G                    A7                    D

And our planet will never survive

Put our waste into the water again

Foolishness it never ends

They fish they all die

And me I just cry

Our planet is dying at last

Cut Down the trees in the scrub

Then you can build above

But do you know who it is

Who gave us all of this

To cherish and not to destroy
